 Building No.3938 Al-Khobar, King Abdulaziz St Madinat Al Umal, Al Khobar 34443

The background is a dark teal gradient. It features several thick, wavy, three-dimensional lines that resemble cables or ribbons. These lines are covered in a pattern of white and light blue binary code (0s and 1s). In the upper left corner, there are two overlapping teal geometric shapes: a triangle and a parallelogram. Diagonal white lines are also visible in the upper left area.

INTRODUCTION

About Future Solutions

Future Solutions for Information Technology was established in Riyadh, KSA in 2019 with the vision to be the best ICT service provider, our mission focus on smart business and digital transformation.

We consider ourselves as the funnel to the IT world as we enable business for more agility and achievement by providing the ICT infrastructure, collaboration solutions, Storage and data backup and cyber security solutions.

Furthermore, we provide services for designing and developing software, building and designing applications for various systems and websites.

We also provide business intelligence services, industrial intelligence and cloud computing services.

The company aims to provide distinctive, high—quality services at competitive prices to help and support its customers and improve its capabilities to open new horizons for their businesses and enable them to remain in the competition circle in a market that is growing in excess of demand and in a highly competitive environment.

MISSION

VISION

Our Mission

To partner with our clients on accelerating their digital transformation initiatives and positioning their digital strategy for the new reality with next generation technologies.

Our Vision

To be the best Digital Transformation (DX) partner for our clients, known for excellency and innovation, in enabling them as digital native enterprise.

teamwork

attitude

CORE
VALUES

honesty

respect

Confidence

A commitment to honesty, integrity and openness among employees, partners and customers.

Innovation

Think outside the box, continuous development & initiative to achieve what serves & makes our customers happy.

Happiness of customers

Fulfilment of customer requirements in the final product.

Flexibility

Launching our capabilities for rapid response to keep pace with the changing requirements of our customers.

Quality

Commitment to the highest levels of quality and honesty in providing our technical services.

Credibility

Commitment and fulfilment of our promises to our employees, clients and partners.

Technology Solutions

Technology Solutions

Next-Gen cybersecurity

1. Next-Gen cybersecurity solutions will help to achieve your mission and build cyber resilience from inside out. With the cyber threat landscape evolving at a rapid scale in a complexly growing environment, cybersecurity has become one of the top business risks.

Are you prepared for the unexpected?

Our cybersecurity solutions and services are custom designed to safeguard your business flow and data assets, ensuring that your business operations are protected and always available. Your cyber space are protected by our experienced experts in the field of technology, business logics and the threat vectors, that cyber criminals leverage in their attempts to gain access.

We offer the complete range of cyber security solutions for operation technology (OT) and information technology (IT), includes Security consultation, monitoring, assessment, compliance, solution implementation and cloud security solutions.

Cloud Solutions and Services

Cloud Solutions and Services

2. Cloud computing is a powerful enabler of digital transformation.

The cloud is more than a technology platform. It's a catalyst for business transformation and growth. We'll work with you to define a business strategy, build a cloud roadmap, optimize your move to the cloud, and implement modern platforms for ongoing operational excellence.

Wherever you are on your cloud journey, we bring curiosity, passion, and deep technical and strategic expertise to every cloud project.

We can provide you cloud security, automated cloud-based data backups, disaster recovery and monitoring.

Our partnership arms are well energized with AWS, Microsoft Azure and VMware VNF.

NextGen Networking & Collaboration

NextGen Networking & Collaboration

3. Innovators have something in common:

A next generation network and collaboration platform.

Your enterprise network and collaboration infrastructure is like the nervous system of your organization and it is a critical success factor for the business.

As a Cisco Gold Partner, we are expert on design, implement and support the network and collaboration solutions, from the core infrastructure of the data center all the way throughout the edge network infrastructure, in the way that best meets your organization's need.

A man in a dark sweater and jeans stands in a server room aisle, holding a tablet. The room is filled with rows of server racks on both sides, illuminated by blue light. A teal and grey banner is overlaid across the top of the image, containing the text 'Enterprise Data Storage Solutions'.

Enterprise Data Storage Solutions

Enterprise Data Storage Solutions

4. Data storage that takes you from insights to innovation
Transform and enhance your business with a comprehensive storage solution.

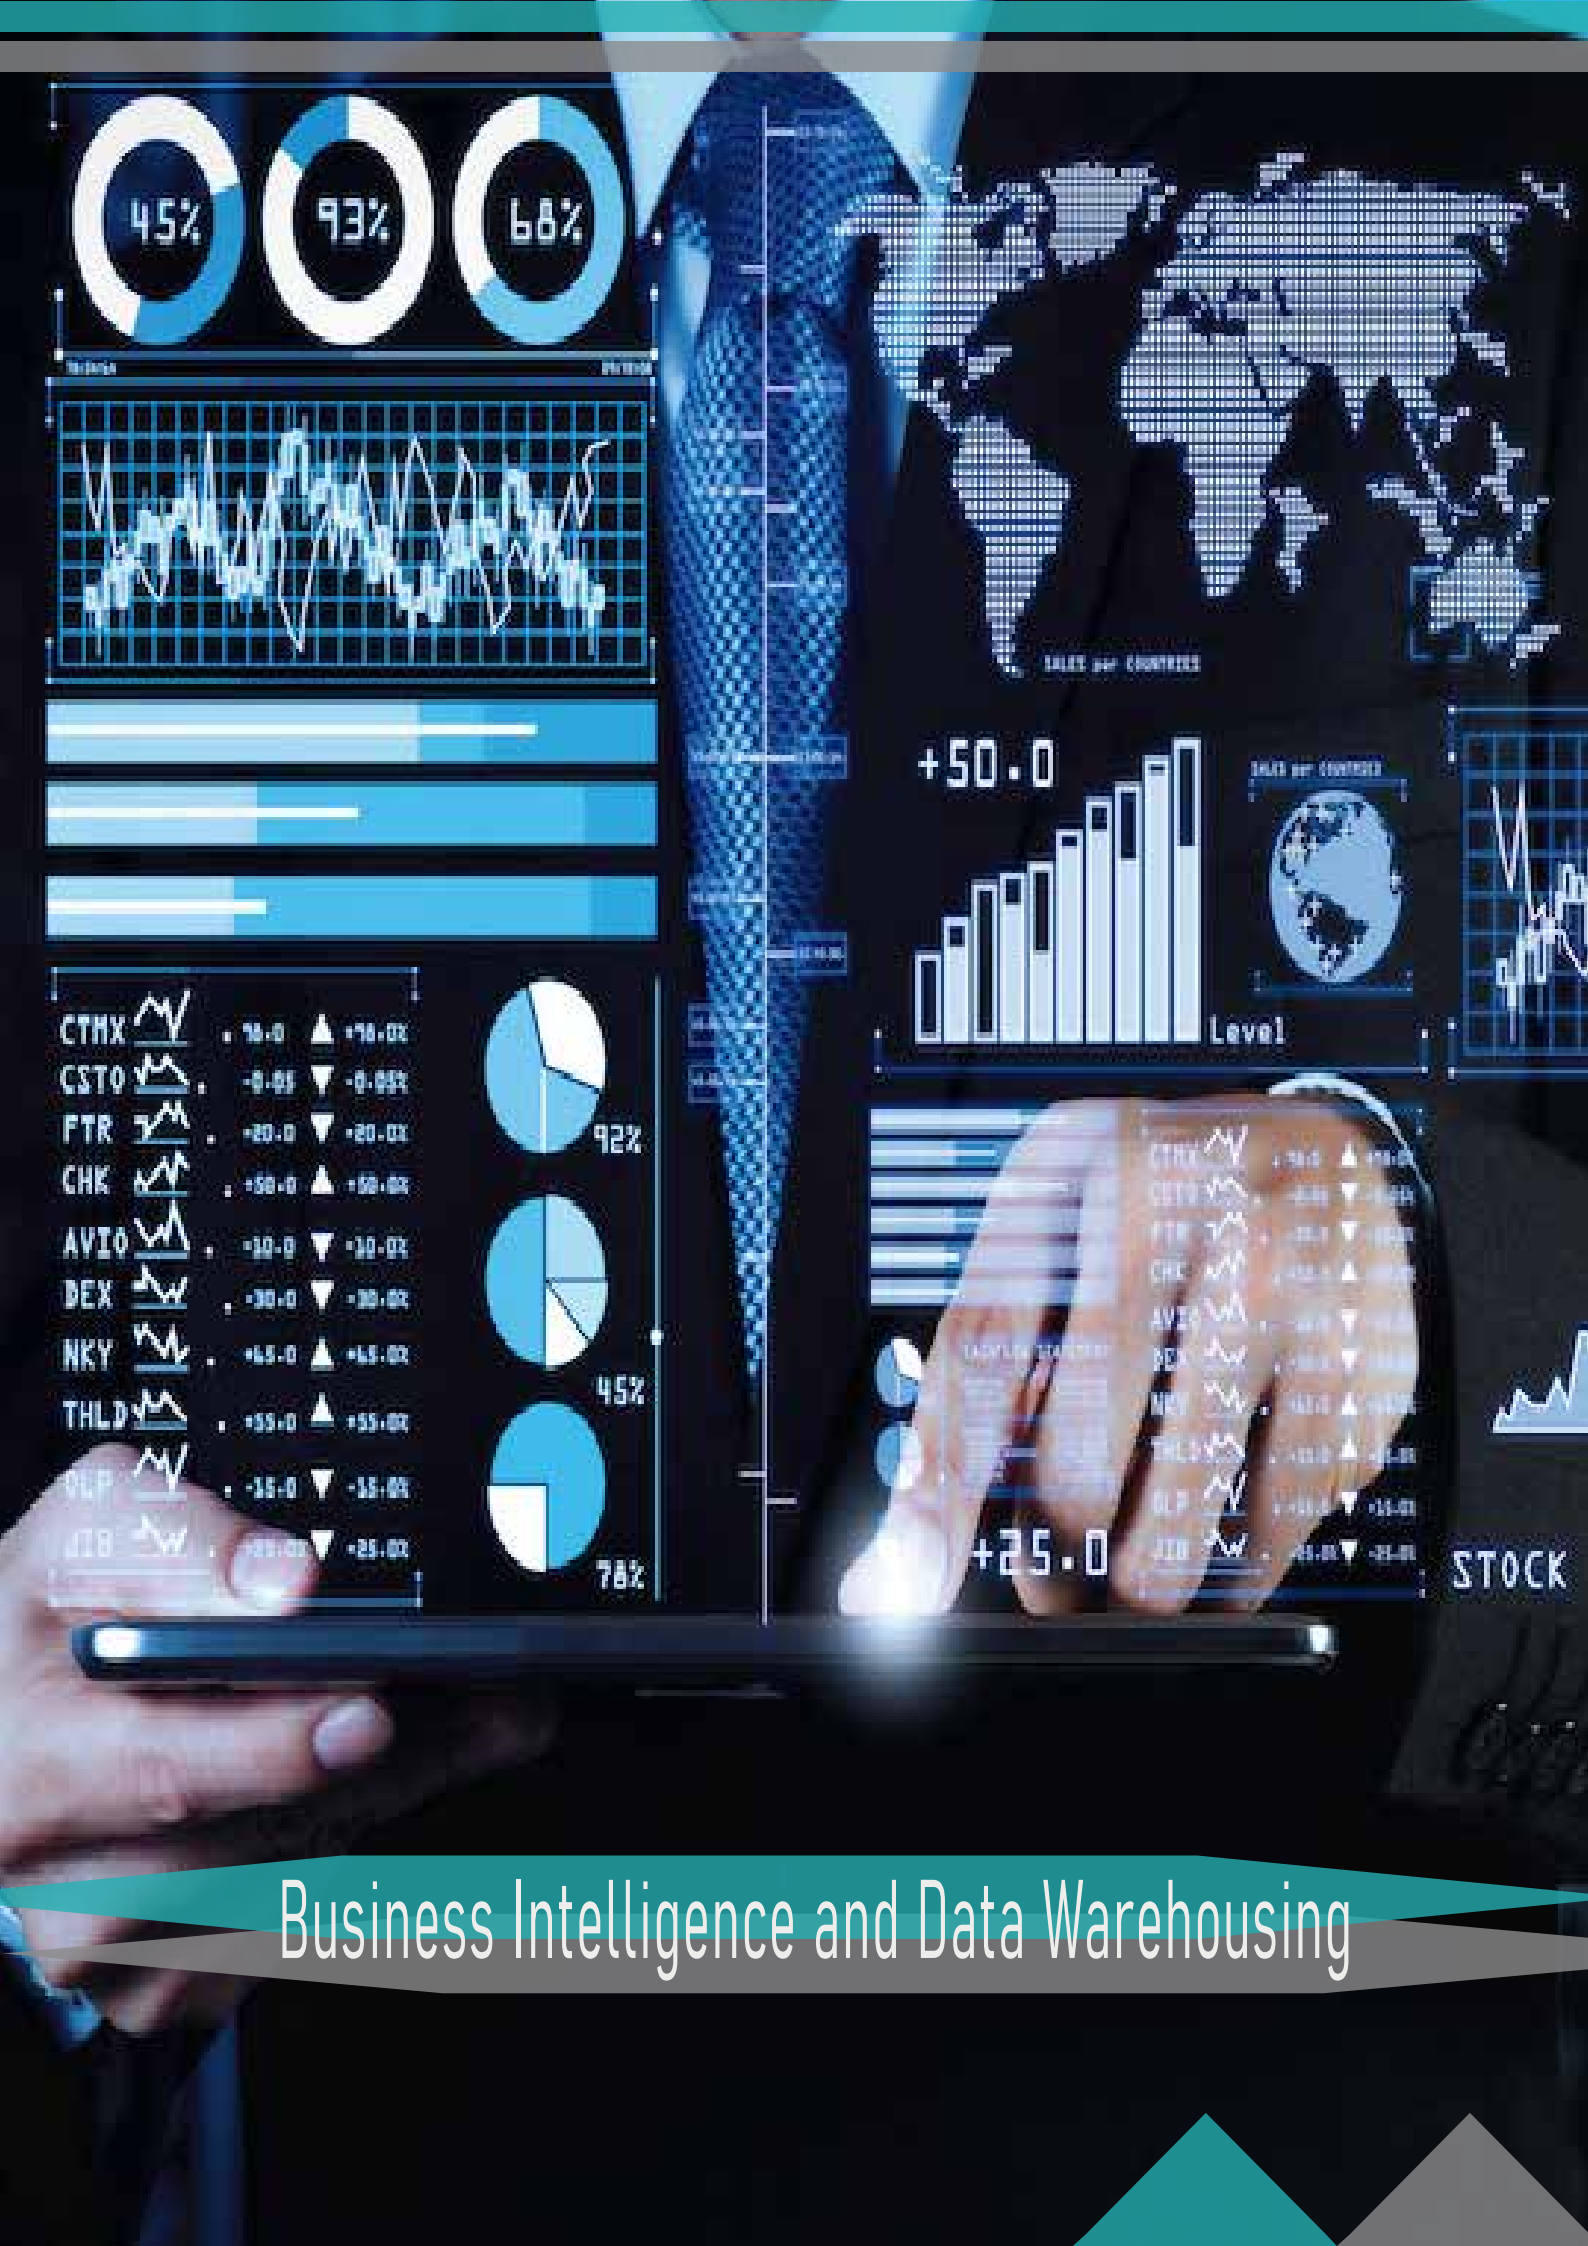

Get the scalability, intelligence, and cloud integration you need to unlock the value of your data.

Accelerate your critical workloads from core to edge to cloud while decreasing application outages and reducing storage requirements with advanced deduplication.

We have the real-world experience and expertise to design and build enterprise-class data storage infrastructure that operates at the highest levels of performance and reliability, regardless of the complexity of the mission requirement.

We can help you to design, build and manage the most challenging of data storage, backup, availability and recovery infrastructures in partner with most respected technology vendors in the world.

Business Intelligence and Data Warehousing

Business Intelligence and Data Warehousing

5. Real-time decision making require a modern data architecture.

Effective decision-making processes in business are dependent upon high quality information availability.

That's a fact in today's competitive business environment that requires agile access to a data storage warehouse, organized in a manner that will improve business performance, deliver fast, accurate and relevant data insights our BI and Data Warehousing services enable clients to harness data and effectively derive valuable business insights.

With our deep-domain expertise and rich experience, we provide meaningful solutions that enable our customer for high quality business decisions and sustainable growth.

Enterprise Mobility

Enterprise M obility

6. Stay Connected, Competitive and create better customer experiences

Mobility is a critical component for businesses today that want anywhere and anytime access to resources and people through seamless integration and flexible connectivity options.

Our approach to mobility solutions provides a fresh perspective.

Using consultancy-led engagements, we deliver customized mobility strategies that offer real business benefits.

Structured Cabling

Structured Cabling

7. A well-designed cabling infrastructure can provide long savings on OPEX, greater business continuity, scalability and resilience.

Structured Cabling provides a single unified solution that encompasses data, voice and video allowing all building systems to use the one cabling infrastructure – vastly reducing costs.

As a leading provider of end-to-end structured cabling solutions, we offer the experience and expertise to turn your cable infrastructure into a strategic business asset.

A modern hotel room with a large bed, a curved window, and a decorative lamp. The room features a large bed with white and dark blue bedding, a curved window with a view of a city, and a decorative lamp with a yellow and blue pattern. The text "Hospitality Solutions" is overlaid on the image.

Hospitality Solutions

Hospitality Solutions

8 ■ Smart Hotel Solutions - Better customer experience @ Lower operating costs

Managing a successful hospitality business requires building a loyal customer base in which guests view you as the “host with the most.” Guests need multiple network services, including High speed internet, Telephone, Video-on-demand, Video conferencing, Internet Protocol.

Television (IPTV) and the operator need of Property Management System (PMS), Digital signage system, Video surveillance and security services, etc.

We can provide end-to-end hospitality solution, to turn your service infrastructure into a strategic business asset.

Our innovative design strategies, provide a quick and clear path for upgrades and expansions, that keep you future-ready.

Empowering Services

Consulting and Design

Our consulting and professional services can add value to your business by providing insights, strategy, architecture, implementation and integration services to accelerate your digital transformation journey.

We provide these services across all range of our technology solutions. We work with our clients to architect a holistic solution that integrates new technologies with the legacy environment, in line with your business strategy. As a digital transformation partner, we can help you on achieving your long-term business goal.

Deployment & Integration

Deploying new technologies and integrating them with existing infrastructure is a challenge for any organization.

Our engineers fully understand the inter-dependencies and potential issues of integrating new technology with your existing systems.

We take a unique approach through strategy, design, engineering and project management to insure that your project is implemented on time and within the budget.

Remote infra. Management and Technical Support

Procurement & Logistics

Remote infra. Management and Technical Support

Remote infrastructure management (RIM) is the process of monitoring and managing IT infrastructure (data center, networks, storage, server, telephony, OS, security, applications and support services) from a remote location with the ability to perform remedial actions to enable continuous availability. RIM enables to reduce IT expenditures and gain faster, more flexible services from the expert's team.

We combine our leading technological expertise with deep industry knowledge to offer the best.

Procurement & Logistics

Procurement and logistics have been our core competencies since our doors opened in 2019.

We help clients to assess their business needs, source, acquire, configure and deploy the best technology solution at the best price through our top tier technology partnerships.

FTTH (Fiber to the Home)

A graphic showing a night view of Earth from space, with glowing city lights. Numerous blue lines representing fiber optic cables originate from the Earth and extend towards the right, where they terminate in a dense cluster of white dots. The background is a deep blue gradient.

Video Surveillance and IP Cameras

A composite graphic with a teal and blue color scheme. In the foreground, a hand holds a white and black IP camera. The background features a grid of video surveillance footage. One frame shows a person walking on a staircase with a timestamp of '00:00:32:08'. Another frame shows a person in a room with a timestamp of '00:00:15:22'. To the right, a monitor displays a multi-camera feed. A glowing circuit board pattern is visible in the upper left corner.

FTTH (Fiber to the Home)

FUTURE SOLUTIONS expert and qualified FTTH staff can provide fast and efficient fiber optic network installation services across the entire KSA.

We offer the best quality workmanship, utilizing the best equipment available, and performing work in a safe manner. Along with major telecom operator and service provider, we are in process of implementing high-speed internet connectivity to every business and house kingdom wide.

Video Surveillance and IP Cameras

Our video surveillance IP cameras are value-added with high-definition view. Their state-of-the-art build is designed to deliver top surveillance in almost all types of environments.

We provide a range of wireless, wired and stationary IP cameras with high quality zoom lens, auto back focus and super low light. Our IP camera offer video analytics with the ability to detect even the slightest movements and any camera tampering.

Our Partners

A full-page background image featuring a close-up of two hands shaking in a firm grip. The hands are positioned in the center, with one hand slightly above the other. The background is a blurred, high-angle view of a city skyline at night, with numerous lights from buildings and streets. The image is framed by teal and grey geometric shapes: a teal triangle on the left, a grey triangle on the right, and a grey triangle at the bottom left. The text "Our Partners" is overlaid on the upper left in a white, sans-serif font.

Our Partners

We have partner-ecosystem built to deliver superior business value based on best-in-class technology.

We work hand-in-hand with selected world class technology vendors. It's the best way to strengthen our unique portfolio in the areas of consulting, solutions and services.

Leveraging complementary capabilities allows us to add superior value to our customers.

OUR CUSTOMERS

The image features a close-up of two hands shaking, symbolizing a partnership or agreement. This central image is overlaid with a complex digital network of glowing blue lines and nodes. Several translucent, glowing cubes are scattered throughout the scene, with one prominent red cube in the upper right. The overall color palette is dominated by deep blues and teals, with a grey banner at the top containing the text. The bottom of the image shows a blurred document with the word 'STRATEGY' visible.

OurCustomers

"Customer-First' approach guides us everything we do.

We partner with our customers to deliver the most innovative and the best business technology solutions. We strive for excellence and measure our success by adding value to our customers.
